

Java Code

```
import java.util.*;

class Solution {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        String a = sc.next();
        int b = a.length();
        int c = 2;

        if (b == 1) {
            System.out.print("1");
            return;
        }

        for (int d = 1; d < b - 1; d++) {
            if (a.charAt(d - 1) == a.charAt(d + 1)) {
                c++;
            }
        }

        System.out.print(c);
    }
}
```
