

Generate All Binary Strings (No Consecutive 1s)

Java Solution

```
import java.util.*;

class Solution {

    public List<String> generateBinaryStrings(int n) {
        List<String> ans = new ArrayList<>();
        solve(n, "", ans);
        return ans;
    }

    public void solve(int n, String curr, List<String> ans) {
        if (curr.length() == n) {
            ans.add(curr);
            return;
        }

        solve(n, curr + "0", ans);

        if (curr.length() == 0 || curr.charAt(curr.length() - 1) == '0') {
            solve(n, curr + "1", ans);
        }
    }
}
```
